EXPERIENCE

Full Stack Web Developer - Le TEC
2025 - Namur

- Developed a full web application covering both frontend and backend
- Built reusable frontend components using React 18 and TypeScript.
- Implemented backend features using PHP 8 and Symfony 6, exposing RESTful services.
- Designed and worked with relational databases (MariaDB, SQL).
- Implemented unit tests to ensure code reliability and maintainability (Jest, PHPUnit).
- Worked in an Agile/Scrum environment, using Azure DevOps for task tracking and collaboration.

Freelance Project Consultant - Dés-mentiel
2022 - Present - 4 ans, Belgium

- Led and coordinated client-oriented event projects from concept to delivery.
- Analyzed client needs and translated requirements into concrete solutions.
- Designed, created, and maintained the company's website.
- Managed project timelines, priorities, and iterative improvements.
- Ensured continuous improvement based on user feedback.
- Used various digital tools for project management, communication, and online visibility.

Web Application Developer - Interface3
2024 - 2025 - Brussels

- Design, develop, and deploy a web project
- Build web applications on both server-side and client-side
- Design and work with databases within web projects
- Implement testing strategies to ensure application quality

Store Manager - Action /Hema
2013 - 2023 - 10 years, Perwez - Ixelles - LLN - Waver

- Managed daily operations and strategic planning across multiple retail locations.
- Analysed sales data and performance indicators to support decision-making.
- Planned, prioritised, and coordinated tasks in a fast-paced environment.
- Recruited, trained, and supervised teams.
- Improved internal processes and enhanced customer experience.

Activities Animator/Coordinator - Aventure Parc
2010 - 2013 - 3 years, Waver

- Supervised groups and adapted activities to different profiles and constraints.
- Organised and coordinated corporate events.
- Managed priorities while ensuring compliance with safety procedures.
- Worked closely with team members and communicated clearly with clients.

Web Projects

- **Green Hiro**
  Narrative game project created during a 3-day hackathon focused on Green IT.
  Technologies: Symfony 7, MariaDB, API Platform, React 18
- **Disneydle**
  Web quiz inspired by Pokedle, developed in collaboration with a frontend developer.
  Technologies: React 18, .NET Web API
- **Portfolio Website**
  School project built using HTML, CSS, and JavaScript only.
- **Projects available at:**
